

The product shall be sold in the EU Market

Last Modified on 02/01/2025 1:57 pm CET

The process of CE marking

1. Identify the applicable directive(s) / regulation(s) and [harmonised standards](#)

The directives and regulations aligned with, or based on the reference provisions of [Decision 768/2008/EC](#), are listed [here](#)

2. Verify product specific requirements

3. Identify whether an independent [conformity assessment](#) (by a notified body) is necessary

4. Test the product and check its conformity

5. Draw up and keep available the required technical documentation

6. Affix the [CE marking](#) and draw up the [EU declaration of conformity](#) (27 KB)

micro

1.

The CE directives (i.e. Machinery Directive 2006/42/EC) are provided in the link to EU commission.

The development team shall evaluate what regulations that is applicable to its product.

or Food Contact Regulation 10/2011

The screenshot shows the European Commission website. At the top left is the European Commission logo. To the right is a search bar with 'EN' and a search icon. Below the logo is a navigation bar with 'Business, Economy, Euro' and 'Internal Market, Industry, Entrepreneurship and SMEs'. The main navigation menu includes 'Home', 'Single market and standards', 'Industry', 'Entrepreneurship and SMEs', 'Access to finance', 'Sectors', and 'Tools and databases'. Below the navigation menu is a breadcrumb trail: 'Home > Single market and standards > CE marking > Manufacturers'. The main heading is 'Manufacturers'. The text below the heading states: 'Manufacturers play a crucial role in ensuring that products placed on the extended single market of the European Economic Area (EEA) are safe. They are responsible for checking that their products meet EU safety, health, performance and environmental protection requirements. It is the manufacturer's responsibility to carry out the conformity assessment, set up the technical documentation, issue the EU declaration of conformity, and affix the CE marking to a product. Only then can this product be traded on the EEA market.'
